

Scenarios Development Process

Special Scenario Initiatives in 2010

● PCD Scenario Nuances

- Increased integration with other care settings (e.g. home deployed devices)
- Increased integration with implanted patient devices (i.e cardiac pacemaker)
- Emphasis on device-related care delivery on meaningful use priorities
 - Patient Safety
 - Care Coordination
 - Engagement of Patients and Families

Special Scenario Initiatives in 2010

● HITSP Construct Support

- IHE-based constructs incorporated into kudu registration and testing oversight tools
- Non-IHE based constructs to leverage HITSP/NIST testing guidance and tools
 - eRx
 - Administrative transactions for health plan eligibility
 - Home-deployed device connectivity to ambulatory and acute care settings
 - Quality measure support
- Incorporation of Federal Health Agencies via CONNECT[®] Gateway Services into standard Connected Demonstration
