

HIMSS10 Leadership Level Benefits, Deliverables & Deadlines- *Distributed Demonstration (Distributed Demo)*

Distributed Demonstration Details: Another benefit available only to Leadership Level is participation in the Distributed Demo at HIMSS10. In brief, participating in the Distributed Demo gives your company a live two-way link between your Showcase station and your vendor booth on the HIMSS conference floor.

Showcase will Provide the Following Items:

- Each Distributed Demo participant will receive one 100 Base T drop in the Showcase area.
- iNOC Consulting (HIMSS Conference networking contractor) will coordinate network configuration including address assignment, routing and connectivity between the Showcase and the main HIMSS10 conference Exhibitor booths.
 - If you have any questions regarding the network please contact Matt Barth at mbarth@inoc.com.

Showcase Participant must Provide:

- Order your network drop to your own booth via the standard HIMSS Exhibition booth channels. The HIMSS10 Exhibitor website will open on September 21, 2009 and orders can be made online at: <http://vendor.himss.org/himss10/docs/ServiceManual/SEC12TelcomNetworkOrderForm.pdf>
- Provide Hubs for fan-out to your systems in your vendor station.
- Order a public TCP / IP address (not private address) in advance to connect your exhibit booth into the Showcase network via the standard HIMSS Exhibition booth channels found at: <http://vendor.himss.org/himss10/docs/ServiceManual/SEC12TelcomNetworkOrderForm.pdf>
- Utilize Public Network IP addresses assigned to you from the HIMSS Exhibition network group for your equipment logically installed “inside” the Showcase router.
