Health Information Technology

Health Information Exchange with Federal Partners Through NHIN

**Conemaugh Health System and U.S. Army Medical
Research and Materiel Command (USAMRMC),
Telemedicine and Advanced Technology
Research Center (TATRC)**

During this demonstration, participants will learn about the Military Interoperable Digital Hospital Testbed (MIDHT). In partnership with Northrop Grumman Corporation, Conemaugh Health System (located in Johnstown, PA) is capable of dynamically assembling a HITSP defined C32 from the Allscripts electronic health record using the CONNECT 3.1 platform. Through exchange with federal partners via the Nationwide Health Information Network, coordination of care and safety should improve for shared patients being cared for in both the public and private sectors. This Congressional Special Interest project is administered by the Department of the Army.
