

The case for Image-enabling an Exchange

HIMSS Interoperability
February 2011

Protecting the Present, *Building for the Future*

Introduction

HIE is not about technology – technology certainly helps but HIE is more about change.- By Dale Emerson, COO of Hielix

- Multiple market changes are driving a standardization of health information exchange
 - Increase in chronic disease management by multiple providers for a single patient
 - Accountable Care Organizations changing reimbursement
 - Patient Mobility
 - Cost containment driving care providers into sub-specialties

Protecting the Present, *Building for the Future*

Diagnostic Imaging

- The inclusion of diagnostic imaging in the assessment and care decisions around disease treatment is well documented

Expanded Use Of Imaging Technology And The Challenge Of Measuring Value
 HealthAffairs - 2010

Protecting the Present, Building for the Future

Creating Value

- The impact of including this type of information in the health care information exchange can create real value to the participants and their patients by allowing providers and patients to collaborate on the treatment of care.

Protecting the Present, Building for the Future

Responding to the changes in Healthcare Delivery

- Within the dynamics of healthcare delivery and the changing landscape of reimbursement, the ability to retain patients and monitor the care process will keep organizations competitive and delivery optimized.

Protecting the Present, Building for the Future

Responding to the changes in Healthcare Delivery

- The mechanisms within the IHE framework provide the tools to delivery this model.

Protecting the Present, Building for the Future

Specific examples of HIE – telehealth

- InSite One will describe how solutions have been deployed to help our clients with their competitive and business needs.
